

In the event you do not have a slide viewer to view our Promo CD or your Final wedding photo CD's, you can download a FREE copy from IRFANVIEW over the internet. I have been using this slide viewer for over 2 years and have found it to be very reliable and easy to use.

To download a free copy onto your PC:

Go to your web browser and type in or click the web address: www.irfanview.com

And follow the directions. Once downloaded:

- Go to FILE and click it.
- Scroll down to Slideshow
- For Setup –
- Under Slide Advancement: Click: either automatic after “X” seconds or the automatic after mouse / keyboard input. Reference below for choice explanation.
- Under Slide Show Options: Click: Loop Slide Show, Suppress errors during playing and Loop MP3 (Background music)
- Under Show Text: Click the box
- Look at the left side lower portion of the dialog box – click: Preview Box
- Next look at the upper portion of the dialog box: the Look in Box: whether it is a file in your PC or a CD your files are located on.
- Pick either all images or selected images to review.
- If all images: Click / highlight all images using the select key and go to the add all key and click it.
- If only selected images: Click / highlight (using the control key) and click add.
- The last thing you need to do is click the play button.
- (See Above) If you selected the automatic slideshow with a specified timer per image than you just sit back and enjoy the show (I suggest you use this option when first viewing our images so you can review all images quickly) and click it
- (See Above) If you intend to review each image in order to make your wedding album choices than I recommend using the Automatic after mouse / keyboard input option and click it. You can review either forward using the spacebar or to see previous images use the backspace key.
- I suggest you have a notebook and pen handy – take down the image name / number designation located in the upper left portion of the PC monitor screen. These are the image numbers I use to provide photos for your wedding album(s)
- Once completed, to exit - hit your Escape (ESC) key on your keyboard
